

Jennifer Sutherst

Jennifer is a Biologist and Environmental Scientist that has worked as an environmental professional and stewardship leader most of her career; and has extensive experience working in freshwater, marine and terrestrial ecosystems. She has worked on projects as diverse as research on climate change for Simon Fraser University to traditional ecological knowledge surveys of marine mammals for the 'Namgis First Nation. She has won awards for her work with Fisheries and Oceans Canada and for the production of the Lost Streams of Victoria informational map. She is a Streamkeepers and

Wetlandkeepers Instructor and has worked extensively with multi-disciplinary teams of volunteers, First Nations, government agencies, and non-profits to achieve habitat protection and stewardship objectives. Currently she is the Estuary Coordinator and Staff Biologist for the Comox Valley Project Watershed Society.

Jennifer will be giving a talk on *Community Estuary Restoration* in the Filberg Centre on Friday, May 13th at 11:20.
